

MILITARY

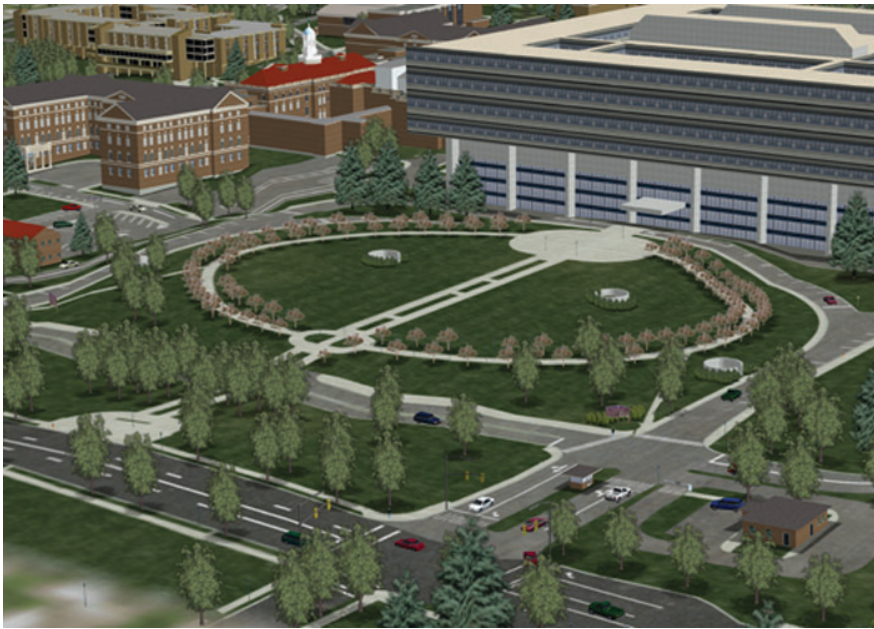

*We help you
maintain a state of
readiness.*

We live in a world full of challenges, a world that is constantly changing and becoming smaller. In the midst of all this, the demands on America grow ever larger. Our responsibilities for leadership, stability, and strength are unparalleled. Throughout our nation's history, the armed forces have been meeting these responsibilities, and today, accomplishing that mission is more important than ever.

The military manages its physical assets—land, infrastructure, facilities, and equipment—while maintaining a comprehensive state of readiness. Never before has the need to plan within budget and implement on schedule been more important. Planning for the future increases the complexity of military projects and requires years of experience, an in-depth knowledge base, and long-term commitments from every member of the project team. Working with a team of professionals that understands these requirements and is committed to respond—whenever and wherever necessary—is vital to your success.

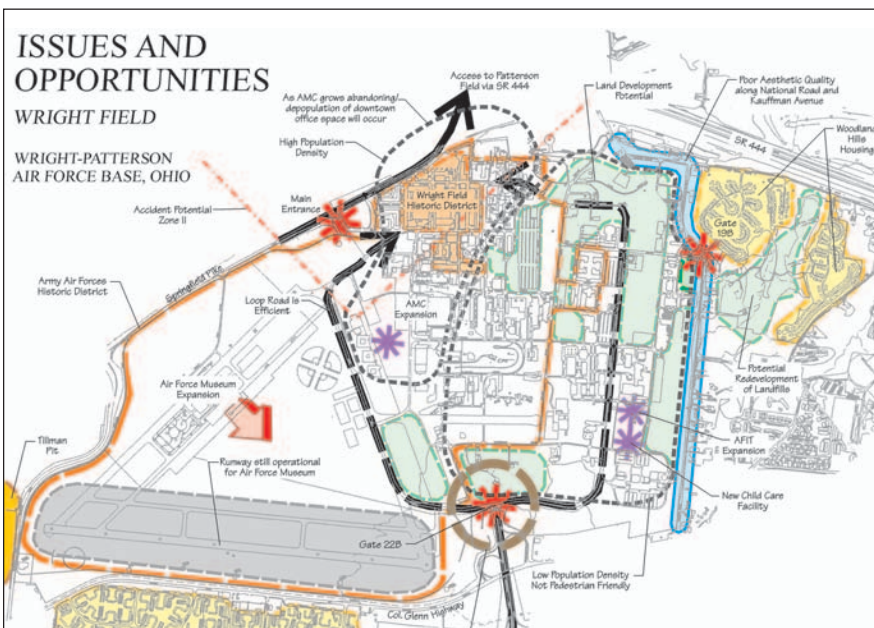

Serving this nation's military has been a part of Woolpert's own mission and culture for more than 50 years. We have worked with the Air Force, Army, Navy, and Marine Corps at all levels—from the Pentagon, Major Headquarters, and Installations to the Reserves and National Guard; throughout CONUS, Alaska, and Hawaii; and from the Pacific Rim to Europe. We are also proud, sustaining members of SAME chapters across the country. Woolpert has the experience, multidisciplinary capabilities, and ability to provide and manage the resources needed for complex, multiple-location assignments and delivery orders. Whatever your requirements, Woolpert will help you meet them.

Woolpert—we help put it all together.

We provide the following services to our military clients:

- Aerial Photography/ Photogrammetry
- Airfield Design
- Architecture
- Environmental Engineering
- Facilities/Infrastructure Management
